

# The 100 Marriage Assessment - Series 1

## Personal Assessment Results

---

### Personal Information

Name: John Smith  
Gender: Male  
Life Stage: Established Adult  
Birthday: 1985-06-15  
Marriage Status: Single  
THM Arranged Marriage Pool: Not applied  
Date: 4/17/2025

### Overall Assessment Score

81%

Understanding Your Score: Your assessment score reflects your judgment of readiness. Higher percentages indicate alignment with traditional expectations. Lower percentages suggest less traditional approaches. Neither is inherently better or worse.

- The most important consideration is how your assessment and your partner's align. If you are married, this indicates how well you and your spouse are aligned. If you are discerning marriage, this indicates how well you align with traditional expectations.
- The closer the percentage (with your spouse), overall, the more aligned you are.

### Your Psychographic Profiles

#### Balanced Visionary (General Profile)

You have a thoughtful, balanced approach to marriage. You value both traditional and modern perspectives, seeking harmony between stability and flexibility. You have a well-rounded understanding of marriage dynamics with a natural balance of core values.

## Section Scores

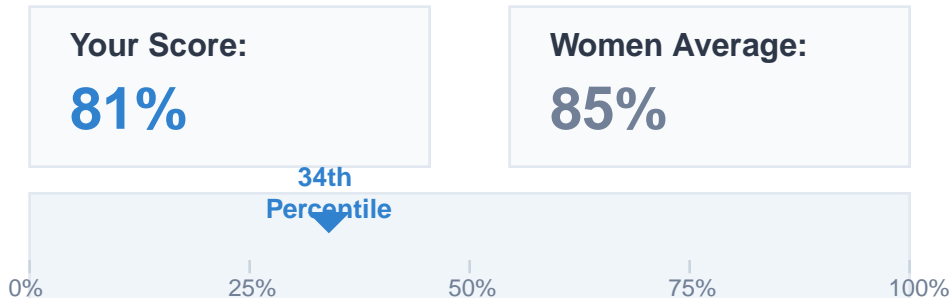

Each section score represents your perspective in a specific relationship area. These scores help to determine your psychographic profiles. Higher percentages typically suggest more traditional approaches to relationships, while lower percentages suggest less traditional approaches to relationships.

Spiritual Beliefs:	92%
Family Planning:	84%
Role Expectations:	88%
Physical Intimacy:	78%
Conflict Resolution:	82%
Financial Values:	76%
Communication:	86%
Support Networks:	72%
Recreation & Leisure:	68%

## How You Compare to Other Women

Based on responses from other women who have taken this assessment, we've prepared gender-specific comparisons to help you understand your results in context.

## Overall Score Comparison

Your overall score of 81% is lower than the average of 85% for women. This places you in the 34th percentile.

### Section Comparisons (Women-specific)

## Communication

(46th percentile)

Average than most women: 1% lower than average

86%

## Understanding These Gender-Specific Comparisons

These statistics compare your results specifically with other women. Higher or lower scores indicate different approaches to marriage, not better or worse ones. The most important consideration is how your assessment compares with your spouse or future spouse, as closer percentages typically indicate better alignment in expectations.

## Your Compatibility Profile

Based on your psychographic profile, we've identified the types of people you'd likely be most compatible with. Closer alignment in expectations suggests better compatibility, but isn't mandatory for a successful relationship.

## Implications for Your Relationships

## Next Steps

Compatibility Type	Ideal Match	Next-Best Matches
